

How you will use this rubric

1. As a guide to help you complete your assignment.
2. As a guide for scoring your peers' work.
3. As a guide for your self-assessment.

How to complete your self-assessment

1. Read over the rubric carefully.
2. Evaluate your work related to each row. You will give yourself a score based on the criteria listed in each column. For example, when evaluating the **Number of variables created** (row 1), if you included a total of **3 variables**, you would give yourself a **score of 3** for that row.
3. Continue to score your work for each row.
4. After you determine your score each row, add your scores together and divide by **9** (total points possible) to determine your average for the assignment.
5. Have questions or need help? Reach out to other learners in the comments section for the assignment.

	0	1	2	3
Number of variables created	None	One	Two (one must be a number)	Three (one must be a number)
Printed story	Didn't use any variables in the printed story	Used one variable in the story.	Used at least two variables in the story.	Used at least three variables.
Quality of the story?	Not a story: no beginning, middle, or end.	Missing two or more of the following: beginning, middle, or end.	Missing one of the following: beginning, middle, or end.	Has a beginning, middle, and end.

Total Points Possible: 9
