How you will use this rubric

1. As a guide to help you complete your assignment.
2. As a guide for scoring your peers' work.
3. As a guide for your self-assessment.

How to complete your self-assessment

1. Read over the rubric carefully.
2. Evaluate your work related to each row. You will give yourself a score based on the criteria listed in each column. For example, when evaluating the **Number of functions** (row 1), if you included a total of **4 functions**, you would give yourself a **score of 3** for that row.
3. Continue to score your work for each row.
4. After you determine your score each row, add your scores together and divide by **6** (total points possible) to determine your average for the assignment.
5. Have questions or need help? Reach out to other learners in the comments section for the assignment.

	0	1	2	3
Number of functions (draw_scene, two draw shapes, and one function that calls the two draw shapes)	One function	Two functions	Three functions	Four functions
Reusability (number of parameters)	Functions are not reusable (no parameters)	Limited Reusability (one parameter)	Good Reusability (two parameters)	Excellent Reusability (three+ parameters)

Total Points Possible: 6
